slow braised
pork carnitas

organic tofu

fresh fajita vegetables

straight talk

years ago, we made a choice to be different; to push the boundaries of what a burrito can be, to change the way all of us eat and enjoy fast food, and to redefine the bond between a company and its customers. inspired by the words of woody harrelson, we believe the following:

"a burrito wants to be something. it aspires. even a common ordinary burrito wants to be something more than it is. it wants to be something better than it is. even a burrito aspires."

food is what we do. it's how most of you judge us. every ingredient we serve has to have a purpose. we strive for unexpected, bold, and addictive flavors influenced by culinary traditions from around the world - "globally inspired," some have said. boloco is all about choice... a true variety of options that matter to you, our guests. this is what makes us different. not everything we do is for everybody, we know that. but keep exploring. your "vice" is on this menu, we promise you.

wait, how can a burrito aspire?

our mission is to better the lives and futures of our people. we use a burrito to do it. and it's literally the most important thing we do. fast food is (traditionally) a terrible place to work, and we've been changing that since 1997. one globally inspired burrito at a time. learn more at boloco.com
